

ANY MOBILE DEVICE

Native apps for all major platforms with an HTML5 option for legacy devices.

ROBUST CAPABILITIES

Powerful out-of-the box functionality plus optimized use of device features for a superior user experience.

EASY ADMINISTRATION

Central management of all users and devices (regardless of platform) including remote data wipe for lost or stolen devices.

RAPID CUSTOMIZATION AND CHANGES

When business changes, quickly create new customizations once - with no coding - and instantly update to all mobile platforms.

Extend the power of the enterprise to the field with FieldOne Sky Mobile - From dispatch and routing to completing work orders, managing invoices, even upselling and cross selling, Sky Mobile delivers the capabilities and resources your people in the field need to provide customers with the best service possible on virtually any mobile device.

Native Apps for IOS, Android, and Windows Phones and Tablets - Leveraging the built-in features of each device, Sky Mobile apps are richer and more secure than any browser-based application. Browser-based options are available for legacy devices.

Powerful Offline Capabilities – Sky Mobile’s native apps better access device resources for a more robust off-line user experience.

Centralized Multi-Platform Customization and Management for All Platforms - Remote administration with no-code customization. Changes are instantly reflected on every mobile platform after synchronization.

With FieldOne Sky Mobile you can...

- Display up-to-the-minute, multi-day field agent schedule and job details
- Call and email contacts, and browse their web sites within the app
- Access vendor, manufacturer, job site and client contact information
- Access information on or offline and automatically sync when a connection is available
- Perform and submit paperless inspection processes
- Change an unassigned slot to other field agents
- Get turn-by-turn driving directions to job sites
- Reassign schedules directly from the handset
- See work order problems on the schedule
- Update work schedule status in real-time
- Record completed schedule slot labor
- Enter and track parts or materials used
- View and work with reference manuals
- Capture customer signature on-site
